

**TO USE ALCOR® TCP FUEL TREATMENT FIRST READ ALL  
WARNINGS AND INSTRUCTIONS ON TCP CAN**

Then calculate the amount of TCP required for each fuel tank. 30ML treats 10 US Gallons Blue 100LL Avgas.

**Using Kit - P/N: 73138**

Remove the cap from the can. Pour out the desired amount of TCP into the clean polypropylene beaker.

Using syringe, pull back on the plunger and draw the TCP from the beaker.

Carefully dispense/ inject TCP into aircraft fuel tank taking care not to get any on painted surfaces.

Repeat the process until all the desired amount of TCP has been added to the fuel tank.
