Press Release – New Product

Cessna Trim Wheel Catch Assemblies

Baldwin City, KS, January 17, 2018 – McFarlane Aviation Products now offers Trim Wheel Stop Catch Assemblies for Cessna Aircraft. McFarlane's FAA-PMA direct replacement has an improved button resulting in a longer service life at a fraction of the cost from the original parts.

For Cessna aircraft with trim wheels, the spring-loaded plungers apply pressure to the trim wheel which maintains its position during use. If you notice a mild creep in the trim system, it is often caused by worn out trim wheel stop catches. Over time, the tips wear and need to be replaced as required. P/N MC0713023-3 and MC0713827-1 are eligible for select Cessna aircraft.

McFarlane Aviation Products has provided general aviation with high quality replacement aircraft parts at an affordable price for over 30 years. For more information, go to www.mcfarlaneaviation.com or call 800-544-8594 or 785-594-2741.
