

## SA-100 Pneumatic Sealant Gun for Semkit & Techcon Cartridges

---

### Product Description:

The B&O model SA-100 is a pneumatic sealant gun manufactured for the use of both Semco and Techcon cartridges. The B&O model SA-100 is designed with a retractable holder system.

The gun will hold 2.5, 6, 8, and 12oz cartridges with only one retainer. This translated into significant weight reduction and consequently, substantial user benefit compared to conventional systems. This unique system (patent pending) will result in a significant cost reduction.

The full view of the cartridge will allow the user to see the level of fluid inside the dispenser. This high end pneumatic sealant gun is made of polyamide 6 (PA6) with 30 % fibreglass and from durable aluminium alloy. It is equipped with an integrated and adjustable pressure control (0.5-6 bar).

### Features:

- One retractable retainer
- Will hold 2.5, 6, 8, and 12 oz Semco and Techcon cartridges
- Cost reduction
- Lightweight
- Ergonomic design
- Tough and durable
- Integrated and adjustable pressure control (0.5-6 bar)
- Engineered for smooth dispensing
- Can be used with or without the retainer
- Replacement parts available
