

CHECKMATE CHECKLISTS

CHECKMATE IFR

In the IFR environment organization and management lead to smoother, stress-free and safer outcomes. CheckMate IFR will assist you through preflight planning to touch-down on the IFR flight. Whether you are cleared for the complete approach or radar vectored to the FAF, CheckMate IFRs format will help keep the flight business orderly and functional. It is precise & specific to the different phases of those sometimes precarious flights. You will be reminded when to prepare and look ahead to each phase. A quick review of CheckMate IFR before flight will help you determine pilot and aircraft preparedness and legalities, how to give those greatly appreciated pilot reports on icing and turbulence, and what ATC expects you to do after radio failure; Professional information in a concise and orderly manner.

SURVIVING THE FIRST 24 HOURS

CHECKMATE®

Surviving the First 24 Hours CheckMate® clearly details the procedures and equipment that you will need to survive a forced landing and the subsequent 24 hours. The preparation before a flight can easily make the difference between surviving or not surviving. This is one of the most important pieces of equipment in a pilot's pre-flight planning.

Available in three sizes.

CHECKMATE CHECKLISTS - CREW AND PASSENGER BRIEFING CARD

Show your professionalism in the cockpit. A clear passenger and crew briefing card elevates your operation and demonstrates commitment to safety.

Small details make a lasting impression, and a well-designed briefing card is a subtle yet powerful way to communicate professionalism and care. For passengers, it shows attention to their comfort, safety, and experience, building trust

and setting your operation apart. For crew members, it provides a consistent, structured way to deliver important information, saving time while reducing variability. Whether you're a solo operator or part of a larger flight operation, a briefing card adds polish and pride to every cockpit.

FLYWRITE COCKPIT WRITING PAD

FlyWrite™ is not another "flight planning" layout. It is designed to give you a dedicated place for all the information that flows while in the cockpit of the aircraft. Convenient top-bound writing pad. Each pad contains 50 5" x 8" sheets and can be used with or without standard junior legal vinyl binders. IFR clearances, ATIS, AWOS, frequencies, flight times, hobbs times, tach times, airport information, frequency changes, hand-off's, altitude changes, weather, etc, now have a home. There is also an area for random information or diagrams. FlyWrite™ also contains a handy vertical scale which measures mileage for WAC, SEC, TAC,

NOS, JEPP, & ELA charts, eliminating the need for that ruler you can never find.....P/N 13-03307

MOUNTAIN FLYING CHECKMATE

CheckMate Aviation's new Mountain Flying CheckMate™ is a full color, plastic card that is a compilation of the special knowledge required for mountain flying. Competent flying in mountainous terrain requires knowledge far beyond what is taught in standard flight courses; and as most pilots discover, sooner or later, flying in mountainous terrain is inevitable.

CheckMate Aviation's Mountain Flying CheckMate™ covers both the rules and common sense of flying that are critical when in this aspect of flight.

Available in 3 sizes.

MICROKIT AUDIO CHECKLIST

The Audio Checklist is NORSEE FAA-approved as minor alteration for installations on FAA-certified airplanes.

The Microkit Audio Checklist is a digital device that plays pre-stored audio files checklists using the airplane intercom or audio panel. The unit can also connect directly to a headset providing the headset can amplify the audio output of the unit. The Audio Checklist unit comes with a remote control to trigger playing a checklist and it offers an interface for up to 3 external push-buttons such as on the panel to trigger playing any checklist. These 3 optional push-buttons can be installed then configured to trigger a specific checklist such as the Emergency Checklist, GUMPS, or Landing (on final) Checklist with a single push.

Owners/Operators are able to upload their own checklists using the built-in WiFi interface.

The remote control offers direct access to specific checklists such as the "Emergency Checklist" using a single dedicated button. Several emergency checklists can be stored and accessed.

Direct access to the next checklist once the previous one is already played, such as the PreStart checklist then the next checklist the unit will play is the Taxi for example, as Owners/Operators decide the order sequence of the checklists when uploading the audio files to the unit.
